

PRADEEP SINGH BHAWARIYA

Senior Java Full Stack Developer (9+ Years Exp.)

Location: Bangalore, India | Phone: +91-7737326539 | Email: pradeepsb094@gmail.com

PROFESSIONAL SUMMARY

Accomplished Senior Java Full Stack Developer with 9+ years of experience engineering high-performance enterprise systems, microservices, and modern Agentic AI/LLM solutions. Specialized in developing scalable backend microservices architectures (Java, Spring Boot, Spring Cloud, Hibernate, OpenShift), cloud-native enterprise platforms, and integrating cutting-edge AI copilots, LLM APIs, and intelligent automated workflows into complex systems. Proven track record of building mission-critical platforms for global leaders like DHL and Cisco, driving end-to-end solution development, API engineering, container orchestration, and agile team execution.

TECHNICAL SKILLS

- **AI & LLM Integration:** GitHub Copilot, Agentic AI Frameworks (LangChain, AutoGen), GenAI APIs (OpenAI, Anthropic), RAG Pipelines, Prompt Engineering, Vector Search.
- **Core Backend & Microservices:** Java (9+ yrs), Spring Boot, Spring Cloud, Spring Batch, Spring Security, Microservices Architecture, RESTful APIs, SOAP, Groovy, Hibernate, JPA.
- **Frontend & UI Frameworks:** Angular (8+), React.js, JavaScript, HTML5/CSS3, JSON, XML, JQuery.
- **Security & Cloud Integration:** Azure AD Single Sign-On (SSO), Azure OAuth, Azure-BLOB, OneSpan Sign, Entitlements Integration.
- **DevOps, Containers & Middleware:** OpenShift Container Orchestration, Docker, Kubernetes, AWS, Jenkins CI/CD, JBoss, Linux Doc Server, Swagger/OpenAPI Spec, Splunk.
- **Databases & Messaging:** Oracle, CockroachDB, SQL Server, MySQL, Vector Databases (Pinecone/Chroma), Elasticsearch, RabbitMQ, Kafka.

PROFESSIONAL EXPERIENCE

Lead / Senior Software Engineer

Encora Innovation Labs India | Bangalore, India (03/2022 – Present)

- Engineered and delivered high-availability enterprise platforms including fleet tracking systems, standardized user access management solutions, and automated car scheme management for global clients.
- Led cross-functional engineering tasks, participating in PI planning, solution development, external stakeholder integration, and continuous delivery across multi-service cloud architectures.
- Engineered robust event-driven microservices backend architectures using Java, Spring Boot, CockroachDB, and RabbitMQ, reducing message latency by 40% and supporting 500k+ daily events.
- Spearheaded containerization and CI/CD automation utilizing Docker, OpenShift Container Orchestration, Jenkins pipelines, and Splunk for distributed logging and observability.

KEY ENTERPRISE PROJECTS (DHL - ITS)

Project DSC User Management | Role: Senior Developer | Client: DHL - Product

Technologies: Java, Spring Boot, Spring Batch, Angular, React.js, Microservices, OpenShift Container, Groovy, GitHub Copilot, Azure OAuth, Azure-BLOB, Oracle, JPA, Swagger, OpenAPI Spec, Linux Doc Server

Engineered a standardized, compliant, standalone User Access Management solution deployed across all IT products in DHL Supply Chain (DSC) to replace application-level user management with enterprise security and single sign-on.

- Participated in PI planning, client interaction, and external stakeholder alignment to clarify technical development requirements.
- Engineered Single Sign-On (SSO) and AZURE Integration for Azure AD-enabled enterprise applications.
- Developed secure RESTful API specifications (Swagger/OpenAPI) and complex Entitlements feature integrations.
- Integrated GitHub Copilot for AI-assisted code generation and automated backend optimization.
- Orchestrated continuous deployment pipelines using Jenkins and OpenShift Container Orchestration.

Project CaMS (Car Management Scheme) | Role: Senior Developer | Client: DHL - Product (Solution to VWG-UK)

Technologies: Java, Spring Boot, Spring Security, Spring Batch, Angular, Microservices, OpenShift Container, Groovy, Azure OAuth, Azure-BLOB, Oracle, JPA, Swagger, PingFed, OpenAPI Spec, Linux Doc Server, OneSpan Sign

Developed an enterprise mobile-interfaced mileage logging platform enabling employees to track vehicle mileage on the go for HMRC compliance, tax precision, fuel benefits, and maintenance tracking.

- Engineered solution design implementations for high-accuracy document management and digital contract signing using OneSpan Sign Integration.
- Developed microservices using Spring Boot, Spring Security, and Azure OAuth/PingFed for high-grade authentication.
- Engineered secure Document Management APIs, handling large-scale document attachments via Azure-BLOB storage.
- Managed OpenShift container orchestration and automated build deployment via Jenkins CI/CD pipelines.
- Interfaced directly with UK client teams to refine technical implementation details.

Project Fleettrack | Role: Senior Developer | Client: DHL - Product (Solution to VWG-UK)

Technologies: Java, Spring Boot, Spring Security, Spring Batch, Angular, Microservices, OpenShift Container, Groovy, Azure OAuth, Azure-BLOB, Oracle, JPA, Swagger, OpenAPI Spec, Linux Doc Server, OneSpan Sign

Modernized the legacy car scheme (ECO/LOAN) by replacing functionally limited paper-based processes with an end-to-end digital agreement, telemetry, and fleet lifecycle management platform.

- Engineered the replacement of legacy paper archive processes with fully digital workflow automation and e-signatures via OneSpan Sign.
- Implemented fine-grained entitlements and security access protocols across multi-tenant enterprise microservices.
- Integrated AI-driven telemetry analytics and route/fleet optimizations using Spring Batch and microservices.
- Configured continuous integration and container deployment workflows on OpenShift using Jenkins.

ADDITIONAL PROFESSIONAL EXPERIENCE

Senior Software Engineer – Zensar Technologies | Bangalore, India (01/2021 – 02/2022)

Project: Cisco Smart Accounts | **Tech:** Java, Spring Boot, Hibernate, JPA, Angular, React.js, Elasticsearch, SQL Server, Oracle, Cockroach DB, Jenkins, RabbitMQ, Docker, OpenShift, Splunk, REST/SOAP APIs

- Engineered core licensing features for Cisco Smart Accounts, a global platform managing product subscriptions for 300k+ enterprise businesses worldwide.
- Developed 60+ REST and SOAP APIs across 10+ Spring Boot microservices within a 30-developer agile engineering team.
- Built an account validation feature identifying and processing 10k+ daily dynamic user onboarding requests securely across global Cisco servers.
- Revamped reporting engine using asynchronous RabbitMQ message queues and Elasticsearch indexing, eliminating client wait times to 0 and dropping complaints to zero.
- Executed comprehensive load testing for 50+ critical API endpoints using JMeter and optimized search performance via Elasticsearch.

Software Engineer – SysArc Informatix Pvt Ltd | Bangalore, India (09/2019 – 01/2021)

Project: MSME Loan Application (Central Bank of India) | **Tech:** Java 8, Spring Boot, Hibernate, Angular, SQL Server, Oracle, SVN, REST APIs, JBoss

- Built MSME Loan Application platform from scratch for Central Bank of India, utilized by 1,000+ branch employees daily.
- Developed 20+ REST APIs and integrated background verification engine with 3rd-party verification APIs to evaluate loan requests automatically in seconds.
- Created 10+ reusable Angular dashboard components and achieved >90% unit test coverage using JUnit and Mockito.

Software Engineer – Silicon India | Bangalore, India (09/2017 – 07/2019)

- Engineered features for an enterprise MDS (ERP/CRM) platform analyzing records across 300k+ business entities.
- Developed custom automated email processing engine leveraging Java and Selenium, managing 100k+ daily automated distributions while dropping spam flags from 70% to 10%.
- Created aggregated analytics dashboards, enabling business users to accelerate market research analysis cycles by 60%.

EDUCATION & CERTIFICATIONS

- **Bachelor of Technology (B.Tech) in Computer Science** – Poornima Group of Institutions, Jaipur, India (07/2013 – 07/2017)
- **Certified SAFe® 5 Practitioner** (Scaled Agile, Inc.)
